Emergency alerts and notifications via
Phone call, text message, and email

State regulations require that customers of the Maiden Creek Township Authority (MTA) be notified within 24 hours of a water emergency situation. In order to comply with the regulations, the MTA has entered into a contract with a company called *Rave Mobile Safety* to provide the Township with an automated telephone notification service. This service is similar to the automated systems used by the surrounding school districts.

The system will only be activated during **emergency** situations. The Township will also have access to this system, and may use the system to provide instructions during an emergency. The Township Manager or a Member of the Board of Supervisors will be permitted to authorize the activation of the system.

To register a cell phone, landline or email address, please log onto www.maidencreektwpauthority.org and click on the *Rave Alerts Register* link. Creating a managed account will allow you access to modify your notification settings and contact information. You may also further customize the types of notifications you receive and add an additional address. Community members are encouraged to sign up for RAVE ALERTS and input their information and notification preferences today.
